

I just read another item in the Beulah Beacon, 06-28-01, about the unfairness of switching to central time in October. If people are too lazy to get out to vote or have to send in form letters unsigned their voice should not now be heard. If they are still unhappy in the next election cycle they should get a petition for a new vote. I still feel that because the vast majority of the residents do business in the central time zone that is where we belong. Farmers that I have known don't work by the clock anyway they work by the weather.
Thank You Carl Cooper
